### Report Overview:

Nerves provide the pathways for both motor and sensory signals throughout the body and physical damage to a peripheral nerve or the inability to properly reconnect nerves can result in the loss of muscle function and/or feeling. Nerves can be damaged in a number of ways. When a nerve is cut due to a traumatic injury or surgery, functionality of the nerve may be compromised, causing the nerve to no longer carry the signals to and from the brain to the muscles and skin and reducing or eliminating functionality. Nerve damage or discontinuity of this type generally requires a surgical repair.
