Report Overview

A biometric fingerprint scanner is a security system that uses fingerprints for biometric authentication to grant a user access to information or to approve transactions. It is a type of biometric security technology that utilizes the combination of hardware and software techniques to identify the fingerprint scans of an individual⁴. Biometric scanners take a single image of your fingerprint, and it will be stored inside the database. Any time you want to gain entrance, all you have to do is place your fingerprint on the scanner and let it compare your print with those in the system to be sure you are who you say you are.

The global Biometric Fingerprint Scanner market size was estimated at USD 5872.4 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 14.85% during the forecast period.
