Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Bird Spike competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Bird spikes are non-lethal, physical bird deterrents made of metal or plastic spikes mounted on surfaces where birds tend to perch, land, or nest—such as ledges, rooftops, signs, solar panels, or gutters. They prevent birds (especially pigeons, gulls, and crows) from roosting by making the surface uncomfortable, without causing injury.

The global Bird Spike market size was estimated at USD 112.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.30% during the forecast period.
