Abstracts

Bitumen-based adhesive is a type of construction and industrial bonding material composed primarily of bitumen—a viscous, petroleum-derived substance—often blended with polymers, fillers, and additives to enhance its performance characteristics such as adhesion strength, flexibility, water resistance, and durability. It is widely utilized for waterproofing, sealing, and bonding applications, particularly in roofing systems, road construction, flooring installations, and pipeline coatings, due to its ability to form robust, impermeable bonds even in challenging environmental conditions. This adhesive is available in various forms, including solvent-based, emulsion-based, and hot-applied variants, each tailored to specific application requirements and installation methods.
