Report Overview

Bitumen emulsifiers market growth will be chiefly driven by the increasing road development and building construction activities around the world. The product is a surface-active agent used in asphalt emulsions to keep the asphalt in its fine droplet state by disallowing it to mix with other droplets. Asphalt emulsion is a mixture of fine droplets of asphalt and water and since the former is a petroleum product, it doesn't mix with water. Due to its sticky nature, it also doesn't easily disintegrate into fine droplets. Thus, bitumen emulsifiers are used so that the asphalt is dispersed in the aqueous phase in the form of discrete particles which remain in suspension due to the electrostatic charges imparted to the asphalt particles by the emulsifier.

The global Bitumen Emulsifiers market size was estimated at USD 99.70 million in 2023 and is projected to reach USD 122.34 million by 2032, exhibiting a CAGR of 2.30% during the forecast period.

North America Bitumen Emulsifiers market size was estimated at USD 27.01 million in 2023, at a CAGR of 1.97% during the forecast period of 2024 through 2032.
