Abstracts

Bitumen emulsion sealer is a protective coating product formulated by dispersing fine droplets of bitumen (a viscous petroleum-based substance) in water with the aid of emulsifying agents, designed primarily for sealing and preserving asphalt surfaces such as roads, driveways, parking lots, and pavements. This water-based emulsion cures through the evaporation of water, leaving behind a flexible, durable, and weather-resistant bitumen film that helps prevent oxidation, water infiltration, and damage from chemicals or UV exposure, while also enhancing the appearance of asphalt by restoring its deep black color.

The global Bitumen Emulsion Sealer market size was estimated at USD 1245.6 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.65% during the forecast period.
