## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Blasting Zirconium Oxide Beads competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Global sales of Blasting Zirconium Oxide Beads reached 15,215 tons in 2024, with an average selling price of \$16.85 per kilogram. Blasting Zirconium Oxide Beads are spherical ceramic particles made primarily of  $ZrO_2$ , produced through melting, atomization, or sintering, followed by screening. They have a Vickers hardness of 600-750 HV and a density of 3.8-4.2 g/cm<sup>3</sup>. They combine the lightweight properties of glass shot with the hardness of steel shot, boasting a cycle life 8-10 times that of glass beads and preventing metal contamination of the workpiece. They are primarily used for shot peening or surface finishing applications requiring iron-free, low dust content, and high coverage, such as aircraft blades, automotive gearboxes, 3C casings, and precision molds. The primary raw material is zircon sand ( $ZrSiO_4$ ,  $ZrO_2$  65%). Global reserves of zircon sand are 72 million tons, with 45 million tons potentially economically mineable. 75% of this is found in Australia (Iluka, Tronox), South Africa (RBM), and Mozambique (Kenmare). China accounts for only 0.6% of global reserves, but imports 900,000-1 million tons annually, representing 55% of global seaborne trade. The June 2025 import price (CIF) was USD 1,650-1,750/ton (66%  $ZrO_2$ , Iluka standard sand), a 14% increase from the same period in 2023. This is primarily due to a 20% production reduction at RBM caused by power shortages in South Africa. Blasting Zirconium Oxide Beads peening is a high-value-added ceramic medium produced through a three-step process: zircon sand → electric melting/sintering → spheroidization. China has mastered the core melt atomization technology and boasts the world's largest production capacity, but high-end aviation-gra

The global Blasting Zirconium Oxide Beads market size was estimated at USD 256.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
