### Report Overview

Blister machine is a kind of equipment capable of manufacturing pre-formed packaging, which can be used to seal food, medicine and various consumer products. Blister packaging machines seal products in a cavity, usually with a paper backing or aluminum or film seal. These blister packs can be used for just about any product, but are common packages for small consumer goods, foods and pharmaceuticals. Most blister packaging machines use heat and pressure via a die to form the cavity or pocket from a roll or sheet of plastic.
