Abstracts

Slimming and weight loss devices are great at helping target areas with excess fat that diets and exercise can't necessarily tackle. While slimming devices and massagers aren't going to replace your workouts or diet plan, they are a good alternative at helping you achieve results faster in a safe way. Some use physical massage to accelerate fat burning, but majority of slimming devices and massagers use either clinically proven Low Level Laser Therapy (LLLT) or Electric Muscle Stimulation (EMS) to aid in toning and strengthening muscles as well as causing loss of fat cells in areas where there are excess fat. Generally, LLLT slimming devices expose fat cells with low levels of red light to slowly destroy fatty acids within the cells whereas EMS devices break down the fatty acids in fat cells that are then gradually detoxed from your body. Other facial and body slimming technology include infrared, Radio Frequency (RF) as well as Mid Frequency Interval Pulse (MFIP) to stimulate lymphatic drainage while you massage the treatment area, which not only reduces fat in targeted areas but also helps firming the skin. Moreover, body and face slimming machines are painless, safe, non-invasive and affordable at home alternatives that reduce stubborn fat, without the need for surgery or the possibility of having to deal with discomfort and other unwanted side effects. According to our Wellness & Health Research Center, the global wellness & health economy was valued at US dollars 4.8 trillion. Asia Pacific was the region with the highest spending on big health in 2022, with a total spending of \$1.68 trillion, followed by North America (\$1.42 trillion) and Europe (\$1.0 trillion). According to the health industry accounting analysis data disclosed by the Health Development Research Center of the National Health Commission, from 2019 to 2021, the market size of the health service industry grew by an average of 7.0% per year, and the specific data increased from 7.7 trillion yuan to 8.8 trillion yuan. China's health industry revenue reached 8.0 trillion yuan in 2021, with an increase of 8.1%.
