Abstracts

The market for bone health ingredients encompasses a diverse range of bioactive compounds, including calcium, vitamin D, magnesium, vitamin K2, collagen peptides, soy isoflavones, and specialized minerals like strontium, which are incorporated into dietary supplements, functional foods, and fortified beverages to support skeletal integrity, prevent bone loss, and reduce the risk of osteoporosis and fractures. These ingredients function through various mechanisms, such as enhancing calcium absorption, promoting bone mineralization, inhibiting bone resorption, or stimulating osteoblast activity, and are targeted primarily at aging populations, postmenopausal women, and individuals with specific nutritional deficiencies or lifestyle factors affecting bone density. The market is driven by rising global geriatric demographics, increasing awareness of preventive healthcare, growing prevalence of bone-related disorders, and advancements in nutraceutical formulations, while also facing challenges related to regulatory compliance, scientific validation of efficacy claims, and competition from pharmaceutical interventions.
