Report Overview

Bovine-based collagen for biomedical applications refers to a naturally derived protein extracted from cowhide or bones, processed and purified for use in medical and therapeutic settings. It is valued for its biocompatibility, biodegradability, and structural similarity to human collagen, making it suitable for applications such as wound dressings, tissue engineering scaffolds, cosmetic surgery fillers, and drug delivery systems. The material is available in various forms, including gels, powders, sponges, and films, tailored to specific medical needs.
