Report Overview

Bovine leather is the most ample and common leather, made from cow, buffalo and calf-skin. In U.S, nearly, 65% of leather products produced are manufactured from cow hides. Cowhide offers various advantages over other sources of leather such as appearance, durability, texture, and comfort. Also, leather manufactured from cowhide is easy to care, relatively cheaper due to high availability, and dirt & water resistant. In addition, cowhide is tough and durable as it is one of the heaviest leathers. Bovine leather made from cow skin is used in virtually every leather product including footwear, handbags, shoulder bags, note case, upholstery, saddlery, holster, purse, wallet, belt, jackets, gloves, and other accessories. Calfskin, being soft, lightweight, abrasion resistant, and lustrous in look, is used to produce high quality, attractive leather for small sized and medium leather goods with a soft, fine feel.

The market is segmented based on type and usage. Based on type, the market is classified into small/fancy leather goods, medium leather goods, and heavy leather goods. Small/fancy leather goods market is further bifurcated into purse, wallets, belt, passport & key case, note case, accessories and others. Medium leather goods market is further bifurcated into leather shoes, handbags, shoulder bags, document & attach cases, and others. Heavy leather goods market is further bifurcated into saddlery, upholstery, holster, tooling & leathercraft, and automotive. The usage of the market are divided into general goods, footwear, automotive, and other sectors.
