Abstracts

Box Trucks Rental Services refers to a business model in which the rental operator (usually a truck rental company) delivers a truck (including trucks, etc.) to the lessee for use within the agreed time without providing driving services. Truck rental services are mainly for individuals and enterprises that need temporary or long-term cargo transportation, such as logistics companies, e-commerce platforms, manufacturing companies, etc. With the rapid growth of e-commerce and cross-border trade, the volume of logistics has increased significantly, and the demand for trucks has also increased. As an important link in the logistics chain, the demand for truck rental has also increased. In recent years, governments of various countries have actively promoted environmental protection policies and put forward higher requirements for the emission standards and fuel efficiency of trucks. This has led to an increase in the cost of purchasing and maintaining trucks for enterprises, and truck rental services can reduce these costs, so they have been favored by more and more enterprises. The continuous advancement of new energy technologies has made electric trucks and intelligent trucks gradually become the new favorites of the market. These new trucks are not only environmentally friendly and energy-saving, but also can improve transportation efficiency and safety. Truck rental companies have introduced new energy trucks to meet the new needs of the market. The government has continuously increased its support for the leasing industry and introduced a series of preferential policies and measures to reduce the financing costs of enterprises and promote the development of the truck operating leasing market.

The global Box Trucks Rental Services market size was estimated at USD 303.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Box Trucks Rental Services market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
