Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Box Type Gas Pressure Regulator competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A building pressure regulating box is a terminal pressure reducing and stabilizing device used in natural gas transmission and distribution systems. It is mainly installed at the gas inlet in residential communities, commercial buildings, or industrial parks to stabilize medium- or sub-high-pressure gas to a usable low-pressure range, ensuring gas supply safety and stable flow. The estimated global sales volume of building pressure regulating boxes in 2024 was approximately 320,000 units, with an average unit price of approximately US\$850 and a typical single-line annual production capacity of approximately 8,000 units. Upstream companies are mainly distributed in the fields of pressure regulating valves, valve body castings, stainless steel and carbon steel pipe fittings, seals, instrument sensors, pressure gauges, electronic control modules, and surface anti-corrosion materials. Downstream companies are mainly gas companies, gas equipment integrators, construction and installation companies, and residential and industrial users. The gross profit margin is approximately 26%. In the product cost structure, raw materials and key components account for approximately 55%, machining and assembly for approximately 20%, testing and calibration for approximately 10%, design, R&D and management for approximately 8%, and logistics and after-sales service for approximately 7%. According to parameters, natural gas can be divided into three specifications: maximum flow rate less than 25 Nm³/h, 25-50 Nm³/h, and greater than 50 Nm³/h; according to inlet and outlet center distance, it can be divided into 200 mm, 200-300 mm, and greater than 300 mm; according to outlet pressure, it can be divided into 2-4 kPa, 4-6 kPa, and greater than 6 kPa; according to installation method, it can be divided into wall-mounted and floor-mounted; and

according to application field, it can be divided into civil and industrial types.

The global Box Type Gas Pressure Regulator market size was estimated at USD 272.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.
