Report Overview

BPO (business process outsourcing) is to outsource a special business process to a third-party service provider. BPO (business process outsourcing) provides a series of flexible services and options for redesigning, managing and running specific business functions. In the past, business process outsourcing was considered as a way to reduce labor costs by transferring its operations to low-cost markets. Modern BPOs look for the most appropriate infrastructure and skills from all over the world to design, build and run processes to help optimize the strategic results that enterprises want to achieve for their customers. BPO was originally related to manufacturing, but now it is adopted by other industries such as finance.

The adoption of systems such as ERP, CRM, SCM, and SFA by enterprises and the industrial Internet revolution have led to the generation of large volumes of data. Moreover, with the increased adoption of big data, the use of business analytics has also surged with a greater need to understand data.
