Abstracts

Bronze wool is a bundle of very fine bronze filaments, used in finishing and repair work to polish wood or metal objects. The global textile chemicals market size was estimated at USD 26.16 billion in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 4.4% from 2023 to 2029. This growth is attributable to a growing demand for apparel, technical textiles, home textiles, and others. With the growing population, the demand for clothes and other textile products is expected to increase, thus fueling the production capacities of this industry. But at present, global trade is getting more complicated due to recession in various countries, resulting in currency fluctuations.
