Abstracts

The brushless electric chainsaw market comprises cordless, battery-powered chainsaws utilizing brushless motor technology, which offers improved efficiency, longer runtime, reduced maintenance, and higher torque compared to brushed motors. These tools are designed for both professional arborists and residential users seeking a quieter, emission-free alternative to gas-powered models, with key applications including tree felling, limbing, pruning, and storm cleanup. Product differentiation often centers on battery compatibility within broader power tool ecosystems, cutting capacity, safety features like chain brakes and kickback protection, and ergonomic designs aimed at reducing user fatigue. Market growth is driven by advancements in lithium-ion battery technology, increasing environmental awareness, urbanization, and the expansion of homeowner DIY trends, though adoption is influenced by factors such as initial cost, battery life per charge, and performance relative to traditional gas-powered options in heavy-duty applications.

The global Brushless Electric Chainsaw market size was estimated at USD 1650.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.45% during the forecast period.
