Abstracts

Building Inspection Services provides independent, objective and holistic solutions, including inspections of fire safety, life safety and security systems. Increasing urbanization across the globe is expected to drive the building inspection services market. Some 4.4 billion people lived in urban areas in 2020, a number expected to rise to 6.7 billion by 2050, according to the United Nations Department of Economic and Social Affairs. According to the Population Reference Bureau, North America is the most urbanized continent in the world. By 2021, 82% of the population will live in cities. In Latin America and the Caribbean, the urbanization rate was 79% in the same year. In 2021, the global urbanization level will be approximately 56%. In Europe, urban populations account for 75% of the total population. The proportion of the global population living in urban areas is expected to increase from 56% in 2020 to 70% in 2050. In 2021, approximately 64.7% of China's total population lives in cities. China's urbanization rate has steadily increased over the past few decades. The other two BRIC countries, Brazil and Russia, have significantly higher urbanization levels than China. On the other hand, in India, the world's second most populous country, only 34.9% of the population lived in urban areas as of 2021. Technology Drives Building Inspection Services Market For too long, people have avoided building inspections or taken shortcuts because of the high costs of equipment, professionals, workers, and insurance, not to mention the risks involved. Modern technology, on the other hand, reduces the cost, time and risks associated with traditional methods, allowing more people to not only perform inspections but also get better reports. Building inspections have changed dramatically thanks to the advent of mobile building inspection software. Take paper notes as you walk through the building. By using an appropriate building inspection software system, it can input data directly into a mobile device. All of this can be done from a smartphone or tablet, making it easier for agents to track clients' reports and other data.

The global Building Inspection Services market size was estimated at USD 959.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.20% during the forecast period.
