These services aim to ensure the safety, functionality, and continuous operation of building structures, electromechanical equipment, public facilities, and environmental hygiene. The scope of services typically includes HVAC system maintenance, elevator inspection, plumbing system maintenance, electrical system inspection and repair, fire protection system testing and maintenance, structural repair, facade cleaning, public area cleaning, landscaping, pest control, and facility management, covering the operational needs of buildings at different stages of their life cycle. Building maintenance services are usually provided on a contractual, per-service, or long-term management basis.
