Report Overview

Bullet-resistant glass is produced using ballistic materials such as polycarbonate, acrylic, glass-clad polycarbonate, and thermoplastics that can withstand any damage from small projectiles and bullets. Bullet-resistant glass is offered in varying thickness according to end user demand. End users of bulletproof security glass include financial services industry, automotive industry, construction industry, and others such as marine industry and aerospace industry. In this report, the bullet-resistant glass market in India is categorized by product type, BRG standard, application, and state. By product type, the market is segmented into polycarbonate, acrylic, glass-clad polycarbonate, and polyvinyl butyral (PVB). By BRG standard, the market has been segmented according to European Standard 'EN 1063', classifying bullet-resistant glass from class B1 to B7 and special class (SG1 and SG2) depending upon the protection level required.

Increasing economic output and defense investments as well as growth of construction, financial, and automotive sectors are factors expected to significantly impact growth of the bullet-resistant glass market in India. The automotive sector is the largest end-user for bullet-resistant glass in India, with increasing number of HNWI's opting for armored vehicles, which in turn drives demand for bullet-resistant glass. Furthermore, ongoing infrastructural developments in the financial sector offer various opportunities for bullet-resistant glass manufacturers in India, as financial institutions, especially in rural areas, are vulnerable to burglary and vandalism.
