Report Overview

The increasing demand for linear low density polyethylene (LLDPE) films market is due to its good toughness, better tear resistance and high mechanical properties when compared with other packaging films. LLDPE films are generally of two types: plain LLDPE films and white LLDPE films. Plain LLDPE films are usually used for packaging of liquid products. While white LLDPE films are white colored film which provides greater ultraviolet (UV) light resistance and is generally used for shampoo, liquid soap/shower gels and other similar products. LLDPE films has better tear and impact resistance film properties when compared to low density polyethylene (LDPE) film. In order to achieve better properties, converters / manufacturers often use layers with LLDPE films, as LLDPE Films are not as easy to manufacture as compared to other packaging films. LLDPE films are transparent and glossy which helps manufactures to make rather attractive packaging formats, thus making the shelf space more attractive for consumers.
