Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Butyl Etherified Amino Resin competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Butyl etherified amino resin belongs to the polymerization type of partially alkyl amino resin, with high hydroxymethyl content, low degree of etherification, and high molecular weight. Butylated melamine resin has a high degree of cross-linking, excellent heat curing speed, hardness, gloss, water resistance, chemical resistance, heat resistance, and electrical insulation. It can also maintain good light and color retention during excessive baking, without affecting the weather resistance of the matrix resin. Butylated melamine resin is soluble in various organic solvents and insoluble in water, and can be used for various solvent based baking coatings with fast curing speed.

The global Butyl Etherified Amino Resin market size was estimated at USD 569.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Butyl Etherified Amino Resin market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
