Abstracts

C wrap labeling machines, also known as full-body sleeve labelers, are automated industrial systems designed to apply 360-degree printed film or paper labels?typically shrink sleeves or stretch sleeves?onto containers of various shapes (bottles, jars, cans, or irregular forms) by wrapping the material around the product and then heat-shrinking or stretching it to achieve a seamless, tamper-evident, and high-visibility finish. These machines are integral to industries requiring premium branding, product protection, and regulatory compliance, such as beverages, cosmetics, pharmaceuticals, and food packaging, due to their ability to accommodate complex container geometries, provide 360? graphics coverage, and support anti-counterfeiting features like perforations or holographic effects.
