The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cable Filling Gel competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of cable filling gel reached 18,500 tons, with an average selling price of US\$3,200 per ton. Cable filling gel is a semi-solid material composed primarily of synthetic oil, thickener, and functional additives. It is primarily used for internal filling and sealing of optical cables, power cables, and communication cables.
