## Abstracts

Cable laser marking machine is a device used for laser marking on products such as wires and cables. Cable laser marking machine uses a high-energy-density laser beam to partially irradiate the surface of the cable, causing the surface material to vaporize or chemically react, leaving a clear mark on the cable. Once this mark is formed, it cannot be easily changed or erased, so it has a good anti-counterfeiting effect.

The global Cable Laser Marking Machine market size was estimated at USD 355.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.70% during the forecast period.
