Abstracts

Calcium ferrous citrate is a specialized dual-mineral supplement compound that combines calcium citrate and ferrous citrate into a single formulation, designed to address deficiencies of both calcium and iron simultaneously, often targeted at populations with increased nutritional needs such as pregnant women, growing children, or individuals with absorption issues. It is valued for its relatively high bioavailability compared to some other mineral salts, as the citrate form enhances solubility and absorption in the digestive tract, reducing gastrointestinal side effects commonly associated with standalone iron supplements.
