Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Calligraphy Pen competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Calligraphy pen is a writing tool designed for calligraphy and artistic font design, with a special nib structure that can be used to create decorative and expressive text. The calligraphy pen market is mainly driven by cultural revival and the return of handwriting art. With the popularity of "slow life" and handwriting culture, especially in regions with strong calligraphy traditions such as China, Japan and South Korea, the demand for calligraphy pens is growing. Calligraphy videos and sharing on social media have also attracted many novices to try calligraphy, driving the development of the market. In addition, calligraphy pens are widely used as creative stationery and gifts for festivals and business gifts, and the consumption scenarios are more diverse. The variety of products, such as metal nibs and replaceable ink cartridges, meet the needs of different users. The popularity of calligraphy courses in the education field, especially in primary and secondary schools, provides stable demand for the market. But the market also faces challenges. The popularity of digital writing tools has caused some users to turn to electronic devices, reducing the use of physical calligraphy pens. Consumers are mostly short-term enthusiasts with low repurchase rates, which affects sales stability. The low-end market is highly competitive, price wars are serious, and profit margins are shrinking. The imbalance of calligraphy culture has led to difficulties in market promotion in some regions. Strict environmental regulations and rising raw material costs have also increased production pressure. Overall, although there are challenges, the calligraphy pen market still has good development potential with the cultural boom and product innovation.

The global Calligraphy Pen market size was estimated at USD 1305.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
