Report Overview

A battery check is necessary because batteries fail for a variety of reasons. Even before the end of its useful life, a battery can fail if you use it in the wrong vehicle, fail to secure it properly in the vehicle causing damage to the plates, let the electrolytic fluid get low or allow corrosion to build up on battery connections, overcharge the battery causing outgassing and fluid loss, or undercharge the battery causing sulfation. The future is digital and so most of the battery testers are digital.
