The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Car Charger with Retractable Cable competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Car Charger with Retractable Cable production reached approximately 20,470 K units, with an average global market price of around US\$ 18.3 per unit. A Car Charger with Retractable Cable is an automotive power accessory designed to charge electronic devices such as smartphones, tablets, and GPS units through a vehicle's power outlet, featuring a built-in retractable cable mechanism for easy storage and reduced clutter. It typically supports various connector types (USB-A, USB-C, Lightning) and incorporates over-voltage, short-circuit, and temperature protection systems to ensure safe and efficient charging during travel. The cost structure of a car charger with retractable cable is mainly composed of electronic components (35%), cable and connectors (25%), housing and mechanical parts (15%), assembly and labor (10%), quality control and testing (5%), packaging (5%), and marketing and logistics (5%). The electronic components include the charging IC, power converter, and safety protection modules, which form the most valuable part. The cable and retractable mechanism contribute significantly to manufacturing cost due to material and precision requirements. The industry chain of car chargers with retractable cables consists of upstream, midstream, and downstream segments. The upstream includes suppliers of raw materials such as copper wire, electronic chips, connectors, and plastic or aluminum housings. The midstream comprises manufacturers who integrate circuit design, injection molding, assembly, and testing to produce finished car chargers. The downstream involves distributors, automotive accessory brands, e-commerce platforms, and retail chains that deliver products to end consumers, including private car owners, ride-share fleets, and commercial vehicle operators. The single-line production capacity

of Car Charger with Retractable Cable is 1,965 to 1,973 K units per year, the average gross profit margin was 36.4%.

The global Car Charger with Retractable Cable market size was estimated at USD 375.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.
