Report Overview

The car clutch cooling fan refers to the cooling device installed on the car engine clutch. The clutch is an important part of the car's engine system, responsible for transmitting the engine's power to the transmission so that the vehicle can shift gears and start smoothly. Car clutch cooling fans are usually driven by motors and automatically control the fan operation based on clutch temperature or vehicle driving conditions. When the clutch temperature is too high, the cooling fan will start and blow cold air into the clutch system, causing the temperature to drop.
