A stack parking system, also known as a car stacking system or automated parking system, is a mechanical parking solution that enables multiple vehicles to be stacked vertically or horizontally, maximizing the efficient use of available parking space. It is designed to overcome the limitations of traditional parking methods and address the growing need for parking in densely populated areas. The rise in vehicle ownership worldwide has put a strain on parking infrastructure. Stack parking systems offer a way to accommodate the growing number of vehicles in a limited space, providing a cost-effective solution for parking needs.
