Report Overview

The car wiper linkage (front and rear) is the mechanical part of the car's windshield wiper system that connects the wiper motor to the wiper arm. They are responsible for transmitting the rotational motion of the motor to the wiper arm, which causes the wiper blades to move back and forth across the windshield. The front wiper linkage is located at the base of the windshield and usually consists of two arms connected to the wiper motor. The arms are then attached to the wiper blade assembly which moves across the windshield. Some cars may also have a rear wiper linkage that operates in a similar manner but is located at the rear of the vehicle.
