## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cargo Thermal Blanket competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global cargo thermal blanket production reached approximately 23.5 million units, with an average global market price of around US\$ 50 per unit. The gross profit margin of major companies in the industry is between 30% ? 45%. Single-line production capacity is 2 ? 4 million units/year. Cargo thermal blankets are specialized insulating covers designed to protect temperature-sensitive goods?such as pharmaceuticals, chemicals, and perishable food?during transport. They help maintain a stable internal temperature by reducing heat transfer caused by solar radiation, ambient heat, or cold conditions. The cargo thermal blanket market is witnessing rapid expansion, primarily driven by the pharmaceutical cold chain, global food trade, and the need for temperature stability in chemical logistics. Rising demand for vaccines, biologics, and specialty medicines that require strict thermal protection has significantly boosted adoption. In parallel, the growth of e-commerce in fresh food and the globalized supply chain has created new opportunities for thermal packaging solutions. Manufacturers are focusing on lightweight, reusable, and recyclable materials to align with sustainability goals. Moreover, advances in reflective films, nonwoven fabrics, and multi-layer insulation structures are enhancing product efficiency. Regions like North America and Europe are leading in adoption due to stringent pharmaceutical regulations, while Asia-Pacific is expected to register the fastest growth, supported by expanding pharmaceutical production and food export activities.

The global Cargo Thermal Blanket market size was estimated at USD 1150.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.40%

during the forecast period.
