Abstracts

Casein is a glue manufactured from skim milk proteins. Cured casein is water resistant, however it degrades in damp circumstances over time. Casein glue is a sort of milk protein-based adhesive. Over a lengthy period of time, the adhesive is known to be quite strong. At normal temperatures, casein glues set or harden due to the loss of water (to the wood substrate) and a degree of chemical conversion of the protein to the more insoluble calcium derivative.
