Abstracts

A casino is more of a tourist attraction and indoor amusement zone. It offers services in hotels, restaurants, and shopping malls. The majority of the revenue comes from gambling. Casinos are concentrated in certain regions because gambling is illegal in several parts of the world. However, a large number of countries are easing regulations to support the growth of casinos because they are becoming very popular and are contributing significantly to a nation"s economy in the form of tax. One trend in the market is shift in consumer gambling habits. There has been a significant change in consumer behavior in the global casino gaming market. The increase in the popularity of gambling apps and social gambling are the major factors expected to propel the growth of the market during the forecast period. Vendors are leveraging the growth in internet using population and increasing adoption of mobile devices to develop innovative social gambling games. The number people participating in social gambling is increasing because they are motivated to compete with friends. With increasing number of friends on social media, players will be able to compete with more friends in their social network. Some of the other reasons for the rise in a number of social players are socializing and interacting through games, user-friendly gameplay, and game tournaments.

The global Casino Gaming market size was estimated at USD 145790.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Casino Gaming market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
