Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cassava Mixed Cat Litter competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Cassava mixed cat litter is a cat litter made of cassava starch as the main raw material, mixed with bentonite, corn starch, tofu fiber and other materials. It has the environmentally friendly, degradable and low-dust characteristics of cassava cat litter and the strong clumping property of bentonite or the functionality of other materials (such as the water absorption of corn starch and the fluffy feeling of tofu fiber). Some products also add activated carbon, antibacterial agents and other ingredients to enhance the deodorizing and antibacterial effects. It can quickly compact and clump after coming into contact with water and is not easy to disperse. It is convenient for cleaning feces and can reduce the irritation of dust to the cat's respiratory tract. It is a composite cat litter that combines the advantages of multiple materials. It is suitable for pet owners who pursue both practicality and environmental protection.
