Cast waterproof protectors are specialized products designed to shield medical casts, splints, or orthopedic braces from water exposure during activities such as showering, bathing, or swimming. These protectors typically consist of waterproof sleeves or bags made from materials like latex, silicone, or thermoplastic polyurethane, often featuring airtight seals?such as adjustable straps, elastic cuffs, or adhesive closures?to create a barrier that prevents moisture from reaching the cast and underlying skin. Their primary function is to maintain hygiene, comfort, and the structural integrity of the cast, reducing the risk of skin irritation, infections, or damage to the medical device, while allowing users greater freedom in daily activities.
