Report Overview

The CCTV analog camera market consists of surveillance cameras that transmit video signals in analog format, typically over coaxial cables, and are widely used in security systems due to their reliability, cost-effectiveness, and ease of installation. These cameras operate on standard resolutions such as 960H or D1, providing sufficient image quality for general surveillance needs, though they are increasingly being supplemented or replaced by IP cameras offering higher resolution and advanced features. The market caters to sectors like retail, banking, transportation, and residential security, driven by demand for affordable and straightforward surveillance solutions. However, growth is tempered by the shift toward digital and AI-powered surveillance systems, though analog cameras remain relevant in cost-sensitive applications and legacy installations where infrastructure upgrades are not feasible.

The global Cctv Analog Camera market size was estimated at USD 3503.85 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
