### Report Overview

The ceiling-mounted welding robot is a robot system for automatic welding tasks. It is characterized by suspending the robot on the ceiling through a hoisting device to achieve flexible operation and efficient execution of the welding work area. Ceiling-mounted welding robots are mainly used in large-scale welding tasks or special working environments, such as automobile manufacturing, shipbuilding, bridge construction and other fields. The ceiling-mounted installation enables the robot to move freely in a large working space and flexibly operate on welding parts, improving production efficiency and welding quality. In addition, ceiling-mounted installation can save floor space and facilitate other operators or equipment to work on the ground.
