Report Overview

Celecoxib API refers to the active pharmaceutical ingredient (API) of the drug Celecoxib, which is a non-steroidal anti-inflammatory drug (NSAID) used to relieve pain, inflammation, and stiffness caused by conditions such as osteoarthritis, rheumatoid arthritis, and ankylosing spondylitis. The Celecoxib API is the chemical compound responsible for the therapeutic effects of the drug. It is a selective cyclooxygenase-2 (COX-2) inhibitor, which means it works by blocking the production of prostaglandins, which are chemicals produced by the body in response to injury or inflammation. By reducing the production of prostaglandins, Celecoxib can help relieve pain, reduce inflammation, and improve joint mobility. The Celecoxib API is typically manufactured by pharmaceutical companies in accordance with strict quality control standards to ensure its purity, potency, and safety. It is then used to produce finished dosage forms of Celecoxib, such as tablets or capsules, which are prescribed by healthcare professionals to treat various inflammatory conditions.

The global Celecoxib API market size was estimated at USD 56 million in 2023 and is projected to reach USD 86.13 million by 2032, exhibiting a CAGR of 4.90% during the forecast period.

North America Celecoxib API market size was estimated at USD 15.84 million in 2023, at a CAGR of 4.20% during the forecast period of 2024 through 2032.
