Abstracts

The global cell and gene therapy CDMO (Contract Development and Manufacturing Organization) market provides specialized outsourcing services for the development, manufacturing, testing, and supply chain management of advanced therapies, including cell-based immunotherapies (e.g., CAR-T), gene therapies, and regenerative medicine products. These services are critical for biopharmaceutical companies, particularly smaller innovators, as they require highly complex, often personalized manufacturing processes, stringent regulatory compliance, and specialized facilities that are capital-intensive and technically challenging to maintain in-house. Driven by rising investment in gene and cell therapy R&D, increasing regulatory approvals for novel therapies, and the growing trend toward outsourcing to mitigate operational risks and accelerate time-to-market, the market is expanding rapidly. Key players are scaling up capacities, adopting advanced technologies like closed-system automation and analytics, and forming strategic partnerships to address evolving client needs, though the sector faces challenges related to high costs, supply chain vulnerabilities, and regulatory heterogeneity across regions.

The global Cell And Gene Therapy CdmO market size was estimated at USD 10302.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.
