## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cellular Network Gateway competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A cellular network gateway is an edge gateway device that integrates cellular wireless technologies such as 4G LTE, 5G (including RedCap), NB-IoT, and LTE-M. It is used to interconnect local wired networks or sensor networks with the public network in industrial, commercial, and consumer scenarios and provide remote management and secure connections. In 2023, global shipments will be approximately 6.3 million units, with a total market size of approximately US\$1.6 billion. The market size is expected to grow to approximately US\$1.77 billion in 2024, with a compound annual growth rate of approximately 10.5% from 2024 to 2030. The price of a single unit ranges from US\$60 to US\$100 at the low end (entry-level NB-IoT/LTE-M modular). The market opportunities mainly come from the digital deployment needs of vertical industries such as smart manufacturing and industrial automation, smart city infrastructure, energy and utilities, transportation logistics and Internet of Vehicles, as well as agriculture and environmental monitoring, as well as the new demands brought about by the explosive growth of 5G connections. Technology trends include integrating high-performance SoCs on the device side to achieve AI edge computing and PoE power supply, supporting LTE-M, NB-IoT and LoRaWAN multi-mode connections and the rapid popularization of RedCap (5G NR-Light) low-power cellular specifications. The future direction will focus on miniaturized designs with higher integration (built-in antennas and eSIM remote management), in-depth integration of edge AI algorithms and GNSS location services, and dedicated gateway solutions for private 5G networks.

The global Cellular Network Gateway market size was estimated at USD 1663.0 million

in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.50% during the forecast period.
