Report Overview

Cement Board Tape, also known as cement backer board tape or cement board joint tape, is a specialized adhesive tape designed for use in the construction industry, particularly for applications involving cement backer boards. These boards are commonly used as a substrate for tile installations in wet areas such as bathrooms and kitchens, due to their moisture resistance and strength. The tape is typically made from a fiberglass mesh embedded in a Portland cement matrix, providing both flexibility and durability. It is used to reinforce the seams between cement backer boards, ensuring a strong and watertight joint. The tape is also designed to bridge any cracks or gaps, preventing water infiltration and potential damage to the underlying structure. Proper installation of cement board tape is crucial for the longevity and integrity of tile installations, as it helps to maintain a stable and waterproof surface.
