Abstracts

Cemented carbide mining tools are cutting and drilling tools made from tungsten carbide (WC) bonded with cobalt (Co), offering exceptional hardness, wear resistance, and durability. These tools are widely used in mining, tunneling, and construction for drilling, cutting, and rock-breaking applications. Common types include drill bits, cutting picks, and shearer picks, which are essential for equipment like rotary drills, continuous miners, and roadheaders. Compared to traditional steel tools, cemented carbide tools have higher toughness, longer service life, and improved efficiency in harsh environments, making them ideal for penetrating hard rock and abrasive materials.

The global Cemented Carbide Mining Tools market size was estimated at USD 1985.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
