Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Central Axle Trailer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global central axle trailer production reached approximately 29148 units, with an average global market price of around US\$ 22 per unit. A central axle trailer is a specially designed trailer whose axle is located near the trailer's center of gravity and whose traction device cannot move vertically.
