Abstracts

The Central Multimedia Display is the primary in-vehicle interface that integrates infotainment, navigation, vehicle status control, connectivity functions, and human-machine interaction. It has become a core cockpit component as automakers shift toward digitalized and software-defined vehicle architectures. Modern systems increasingly emphasize larger screens, high-resolution panels, smoother UI rendering, and seamless integration with smartphones and voice assistants. The upstream supply chain includes display panels (LCD, OLED, Mini-LED), touch modules, driver ICs, processors (automotive SoCs), and operating system platforms. Key suppliers include panel makers, semiconductor companies, and UI/UX software vendors. The downstream consists of Tier-1 integrators (such as Continental, Bosch, Harman, Desay SV, and Visteon), who assemble complete head-unit systems and deliver to OEMs across passenger vehicle and commercial vehicle segments. The industry increasingly reflects deeper vertical collaboration, with OEMs co-developing cockpit software and domain control units to differentiate user experience. Gross margins generally fall in the 12%-22% range, varying by screen size, panel technology, and level of software integration.

The global Central Multimedia Display market size was estimated at USD 7626.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
