Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Centralized Photovoltaic Storage Solution competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Centralized PV Storage Solution is an energy system that integrates photovoltaic modules, inverters, energy storage batteries, energy storage converters (PCS), boost systems, and energy management systems (EMS) at large power plants or grid nodes. This solution emphasizes centralized deployment, high integration, and grid interaction capabilities, and is suitable for ground-mounted power plants, industrial and commercial parks, and integrated power generation, grid, load, and storage projects. The system is priced at approximately \$300/kWh, with global sales of approximately 25,000 MWh. The market for centralized PV storage solutions is rapidly evolving towards high capacity and system-level intelligence. Its upstream segment covers cell technologies such as LFP, vanadium redox flow battery, and sodium-ion batteries. Key components include photovoltaic modules, PCS, EMS, and boost systems, primarily composed of battery manufacturers, inverter companies, and system integrators. Downstream, it targets grid companies, park operators, and government projects, with deployment forms mainly including containerized, ground-mounted, or boost station integration, and requiring support for remote EMS dispatch, grid control, and national standard ride-through testing. Future development trends focus on long-term energy storage (4-6 hours), grid-based operation, multi-energy synergy (wind, solar, hydrogen storage), and the integration of power generation, grid, load, and storage. Meanwhile, sodium-ion and flow batteries are gradually replacing lithium batteries, and policies are promoting the marketization of grid-side energy storage and frequency regulation ancillary services. Leading companies in the industry have achieved gross profit margins of 35-55%, demonstrating strong profitability and

technological barriers.

The global Centralized Photovoltaic Storage Solution market size was estimated at USD 7568.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 15.00% during the forecast period.
