Report Overview:

Certificate authority (CA) is an entity that issues digital certificates. A digital certificate certifies the ownership of a public key by the named subject of the certificate. This allows others (relying parties) to rely upon signatures or on assertions made about the private key that corresponds to the certified public key. A CA acts as a trusted third party—trusted both by the subject (owner) of the certificate and by the party relying upon the certificate.

The Global Certificate Authority Market Size was estimated at USD 72.45 million in 2023 and is projected to reach USD 101.61 million by 2029, exhibiting a CAGR of 5.80% during the forecast period.

This report provides a deep insight into the global Certificate Authority market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, Porter's five forces analysis, value chain analysis, etc.
