Abstracts

Anterior interbody cages are titanium cylinders that are placed in the disc space. The cages are porous and allow the bone graft to grow from the vertebral body through the cage and into the next vertebral body. The cages offer excellent fixation, so most patients do not need additional instrumentation (e.g. pedicle screws) or post-operative back braces for support. This report studies the Cervical Interbody Fusion Cage market. Global key players include Medtronic, Depuy Synthes, Stryker, Zimmer Biomet, BBraun, etc. Global top five players hold a share about 60%. North America is the largest market, with a share about 80%, followed by Europe and Asia-Pacific, having a total share about 15 percent. In terms of product, Polymeric type is the largest segment, with a share about 90%. And in terms of application, the largest application is Treatment of Spinal Diseases, followed by Control Spinal Deformity Development, Protection of Spinal Nerves, etc.

The global Cervical Interbody Fusion Cages market size was estimated at USD 1038.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
