Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on CFexpress Type A Memory Card competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The CFexpress Type A memory card is the smallest physical specification in a high-performance flash memory card standard proposed by the Compact Flash Association in 2017. The card size is 20mm×28mm×2.8mm, uses a single-channel PCIe3.0×1 interface and follows the NVMe protocol. It can provide a full-duplex bandwidth of up to about 1GB/s, which is very suitable for professional photography and image acquisition equipment that have extremely high requirements for space and transmission rate. As the smallest form factor in the CFexpress standard, the CFexpress Type A memory card has gradually gained traction in professional photography, video production, and high-end image capture equipment due to its compact size and high-speed transfer performance. The market has maintained steady growth in recent years. Major manufacturers include Sony, Sandisk, Lexar, and Delkin. While upstream demand relies on NAND flash memory and controller chips, downstream demand focuses on scenarios such as high-resolution video and RAW continuous shooting, which require extremely high speed and stability. This is driven by evolving content creation needs and the trend toward lightweight equipment. However, its high-end positioning and limited compatibility have hindered its wider adoption. Overall, it is expected to expand further in professional imaging and some industrial applications. If manufacturers can increase capacity, reduce costs, and strengthen cooperation with camera and imaging equipment manufacturers, they will help drive faster market development.

The global CFexpress Type A Memory Card market size was estimated at USD 73.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.90% during the forecast period.
